Latest Version

The latest available version of Griffith is 0.11.

System Requirements

Griffith requires the following libraries:

- Python 2.3 or later
- PyGTK 2.6.1 or later (including Glade)
- pysqlite2 2.0 or later
- SQLAlchemy 0.5 or later
- ReportLab 1.19 or later
- Python Imaging Library (PIL)

Other (optional) dependencies:

- pysqlite legacy 1.0 - it is required for Griffith \leq 0.6.2 compatibility
- Psycopg2 - PostgreSQL support
- MySQLDb - MySQL support
- Chardet - detecting CSV file encoding
- Python-gnome-extras 2.10 or later is recommended for basic gtk-spell support under UNIX

Use: `./griffith --check-dep` to check dependencies and `./griffith --show-dep` to show available versions of all required and optional Python modules.

See README file for more details. If you are using a modern Linux distribution you will probably find these libraries already installed.

Sources

Griffith tarball: `griffith-0.11.tar.gz` or `griffith-0.11.tar.xz`

Griffith-extra-artwork tarball: `griffith-extra-artwork-0.9.4.tar.gz`

Microsoft Windows

Under Microsoft Windows, you don't need to install a GTK+/Win32 Runtime Environment or any other libraries - everything is already included in the installer.

Please remove all old installed versions of griffith before the new version is installed.

Windows Installer (includes extra-artwork): `griffith-0.11-win32.exe`

Debian / Ubuntu

Griffith is available in official Debian and Ubuntu repositories. You can however download it from our site (see below).

Extra artwork is available in separate package: `griffith-extra-artwork_0.9.4-1_all.deb`

Debian and Ubuntu: `griffith_0.11-1_all.deb` (Lenny backport: `griffith_0.11-1~bpo50+1_all.deb`, you will also need `python-sqlalchemy` from Debian testing or sid)

Griffith's Debian Repository

Add to your `/etc/apt/sources.list`:

```
deb ftp://ftp.berlios.de/pub/griffith/ ./
```

or

```
deb ftp://ftp.berlios.de/pub/griffith/experimental ./
```

Run as root:

```
aptitude update && aptitude install griffith griffith-extra-artwork
```

or

```
apt-get update && apt-get install griffith griffith-extra-artwork
```

Arch Linux

Griffith is available in official Arch Linux repository and is maintained by Alessio Bolognino. To install it, just type:

```
pacman -S griffith
```

SUSE

Thanks to Toni Graffy Griffith is available for SUSE users. See package details.
Gentoo

Just

```
emerge -a griffith
```

Thanks goes to Krzysztof Pawlik.

See also packages.gentoo.org.
PLD

```
griffith-0.9.3.1-1.noarch.rpm, griffith-0.9.3.1-1.noarch.rpm
```

Spec file is available in CVS repository.
RedHat / Fedora

You can find RPMs for Griffith at DAG and FreshRPMs. Thanks to Dries Verachtert.
FreeBSD

Griffith has been added to FreeBSD ports. Thanks Andrew Pantyukhin!
SVN

Please, check the development page for SVN access information.
